

They once were lost...

Finding those you love -
with your personal mobile 911 emergency system

S911 Lola S

Locate to Protect

The Laipac s911 products are your very own personal 911 emergency system in one small mobile device.

- quick, one-button emergency alerts and calls to your personal responder
- responders can even get automatic alerts upon a fall or other events
- Laipac device and online technologies enable responder to pinpoint the lost person, communicate, and help bring to safety

My Mom is suffering from early stage Alzheimers and went missing one morning around 9:30 am. The combination of the bush, the elements, cold night temperatures, wild life, and lack of vital medications create a serious situation when she does this, and it's happened more than once. 150+ people search team, police canine tracking unit, police search & rescue teams on the ground, police search helicopter and tracking high powered spot lights ... we were all fearing the worst had happened. ... I got onto the internet at 3:30 am to find this Laipac Device. We now have it, and this provides us with peace of mind, safety and security for my Mom's well being, a huge relief for my Dad and our family as the primary caregivers, and retains an element of degnity for my Mom as we can now keep her in her own home longer.

-- Ruth, Marmora, Canada

GPS Location

- caregiver can find the lost (via LocationNow)
- real time position reporting
- automatic alerts (entering/leaving geo-fences)

Two-way Voice Communication

- one-button panic calls with alerts
