S911 Lola S - Locator

S911 Lola S for Police and Military

The speed of acquiring and processing information across law enforcement forces is paramount. S911 Lola S is a solution designed for Incident Command Systems. S911 Lola S solution has a tactical battlefield edge and is ideal for public safety and military applications. The goal is to effectively employ data and transmit it into action for the response team. This solution allows the incident command leaders to see the deployment of each team like "dots on a map" in real-time. The visualization can be done by accessing to LocationNow platform. The command leaders can geolocate agents, set geofencing, receive exit and entry alerts, playback the historical movement, review the after-action report, conduct an analysis of the operation based on the timeline of the events, and support situational awareness with street view. S911 Lola S improves the making of decisions during high-risk events while reducing the cognitive load of incident command personnel. It helps to achieve higher coordination during law enforcement or military operations.

TECHNICAL SPECIFICATIONS

- 4G LTE with GNSS Receiver (AGPS)
- Tracking Sensitivity: -165dBm
- Acquisition Sensitivity: -146dBm
- Time to First Fix - Cold start: <35 seconds
- Time to First Fix - Hot start: 1 second
- Autonomous Position Error (CEP): 1.2 m
- LTE Bands: B2, B4, B5, B12, B13, B14 (North & South America version)
- LTE Bands: B1, B3, B7, B8, B20 (Europe & Rest of the world version)
- Receive calls with auto-answer, or silent calls without ring tones
- Email alert and SMS for up to 4 responders
- Mobile App for Android and iOS smartphones
- Battery lasts > 16 hours with reporting every 5 minutes
- Battery lasts > 25 hours with reporting every 10 minutes
- Maximum operation temperature: 60 °C
- Minimum operation temperature: -20 °C

FEATURES OF S911 LOLA S
